

FONTANA WOOD FIRED OVENS

The Fontana range feature a dual chambered design, which directs heat from the fire chamber to the cooking chamber providing consistent and even temperature for optimal cooking. The convection controlled cooking chamber has multiple racks allowing you to cook several dishes at once.

The ovens are constructed of 2.5 millimetre of 304 & 441 stainless steel reinforced with a 5-millimeter Corten steel panel and heavy-duty Cast Iron doors provides years of durable, rust-free performance.

A full 12 centimetres insulation surrounds the cooking chamber to maximize heat retention and cooking efficiency and keeps the exterior safe to the touch while at cooking temperature.

Fontana ovens are designed and 100% made in Italy by skilled artisans using the finest, most durable materials.
